Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 6 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The phrase "the outer floor surface meet" is unclear and confusing. It appears have some words missing.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Gladden (3,586,013) in view of Mahn (6,497,934). Gladden discloses the use of tent (10) comprising a corner portion including a first receptacle (45) that is formed by the corner portion of the tent fabric in the inner direction of the tent; a second receptacle which is formed opposite the first receptacle in the contact part where a first floor link is sewn to the outer wall surface of the corner portion of the tent fabric and a second floor link which is sewn to the outer floor surface meet. Gladden shows the use of all the claimed invention but fails to show the use of a waterproof-coated member and a waterproof

tape attached to the sewing lines. Mahn teaches the use of a waterproof-coated member and waterproof tape attached to the sewing lines. It would have been obvious to one of ordinary skill in the art at the time of invention to modify the tent fabric with waterproof-coated member and waterproof tape as taught by Mahn, in order to prevent water from seeping into the tent.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following patents are cited to further show the state of the art with respect to tents: U.S Pat. No. 5820189, 4305414, 4625468, 3953949, 6681785, 5715854, 4665935, 6772779, 5964236.
